

Developed measuring tools for sale

The ialc has developed various measuring tools to facilitate accurate determination of the results. The following table shows the available quality tools. All devices can be viewed through ialc or directly from the manufacturer. All prices are indicative prices, and are also dependent on the order volume.

Photos	Nr.	Name of the tool	Application	Production source	Price	
					EURO	Swiss Fr.
	1	Threshold ruler for precision bucking	The tool is used for measuring the remaining wood in precision bucking	Lamello AG company in Bubendorf Switzerland, available through ialc	440.00	550.00
	2	Digital stump measuring tool for tree felling	The tool is used for all measurements on the stump	Lamello AG company in Bubendorf Switzerland, available through ialc	600.00	750.00
	3	Stump gauge at limbing	The tool is used for control of stumps in limbing event	Available through ialc: Daniel Kleger Technical Department	60.00	100.00
